

The Experts in Oracle Business Analytics

About Vlamis Software Solutions

For more than 25 years and across hundreds of successful implementations, Vlamis Software Solutions has been integrating Oracle’s business analytics solutions for many of America’s leading organizations. From large retailers to world-class financial institutions and from CPG manufacturers to the entertainment industry’s leading lights, Vlamis has delivered exceptional analytic insights and blazing performance. We specialize in the analytic options to Oracle Database including Oracle Advanced Analytics (Oracle Data Mining and Oracle R Enterprise), OLAP, Spatial and Graph, and Database In-Memory. Unlike many business intelligence “body shops”, we have deep technical knowledge of analytics from the computation of predictive data mining algorithms and the intricacies of multi-dimensional OLAP cubes through the entire stack to the visual design of dashboards, graphs, and tables as informed by human cognition research.

Our consultants boast an average of more than 20 years hands-on experience in Oracle technologies. Every team member was selected based on their business insight, technological curiosity, systems experience, and passion to help others. We have fostered strong working relationships with Oracle product management teams. Our active contributions to beta programs, participation in product advisory councils, and leadership in the Oracle community all help us get access to critical resources.

Value Proposition

We guide our clients to the best solutions through a high level of expertise. We outfit you with the best business analytics offerings, teach you how to use them, and set you on the path so you can explore on your own.

Services

Vlamis designs and implements business analytics projects using the full range of Oracle technologies, including: all Oracle BI offerings, data warehousing, ETL, OLAP, data mining and R.

We bring our extensive experience in multi-dimensional data modeling to all of our projects. We offer the following:

- Assessments, Health Checks, Audits
- Analytic Warehouse Architecture Design
- Analytic Workflow Design
- Performance Tuning
- Proofs of Concept and Prototypes
- Professional Requirements Gathering and Documentation
- Training and Mentoring
- Workshops and JAD Sessions

Geography	US and some International
Contact us	40 Westwoods Dr. Liberty, MO 64068 816-781-2880 www.vlamis.com info@vlamis.com

No job is too small, large, simple or complex

Why Vlamis?

Several key differentiators contribute to ensuring that your business analytics system is successful:

- Oracle experts – Vlamis has focused on Oracle technology for 25+ years.
- Experienced Consultants – Our consultants know BI business processes and technology with over 200 BI projects.
- Cutting edge – We’ve been on more than 20 beta programs over the last 15 years including OBIEE, OLAP, and Oracle Database 12c, Oracle University’s Predictive Analytics courses (several).
- Connections at Oracle – Access to product management and developers ensures that any issues are addressed quickly.
- Remote work – We are able to hold down costs by working offsite some of the time.

Oracle Technologies

We use the following Oracle products in our projects:

- Oracle BI applications
- Oracle BI EE
- Oracle Database
- Oracle Data Mining
- Oracle R Enterprise
- Oracle OLAP
- Oracle Database In-Memory
- Oracle Spatial & Graph
- Oracle Data Integrator
- Oracle Exadata
- Oracle Exalytics
- Oracle Database Appliance
- Oracle Big Data Appliance
- Oracle Big Data Discovery
- Oracle Database Cloud Service
- Oracle Cloud
- Oracle R Advanced Analytics for Hadoop (ORAAH)
- Oracle Advanced Analytics
- Oracle Warehouse Builder
- Essbase
- Oracle JDeveloper
- BI Publisher
- Oracle MapViewer
- BICS (BI Cloud Service)
- Data Visualization Cloud Service
- Oracle Machine Learning

Awards and Qualifications

- Oracle Gold Partner, specialized in Oracle BI Foundation 11g
- Multiple Oracle ACE designations
- Oracle Magazine Editorial Board
- Authors of Oracle Press books “Data Visualization for Oracle Business Intelligence 11g” and “Oracle Essbase & Oracle OLAP: The Guide to Oracle’s Multidimensional Solution”
- Presented 100+ sessions at Oracle OpenWorld and national and regional Oracle user group conferences past five years
- On Board of Directors for BIWA SIG
- Named contributor to Oracle University’s Advanced Analytics curriculum (Oracle Data Mining and Oracle R Enterprise)
