ORACLE®

Agenda

- What is BIC2g
- Getting Started
- BIC2g:BI Content
- BIC2g:EPM Content
- Image Differences
- Next Steps
- Q & A

BIC2g – What is it?

- Fully pre-configured self contained virtual appliance with the Oracle Business Intelligence technology and applications stack
- Complete with product, demonstrations, and training material
- Network enabled for use in POCs.
- Instant quick start environment for demonstration and POC situations
- Configuration includes solution integration examples and demonstrations

Availability: Linux Version

- Linux version currently available on OPN
- Includes database 11g, BIEE 10.1.3.3.2, Hyperion 9.3.1, SOA 10.1.3, Data Integrator 10.1.3.4, Data Miner, Portal 10.1.4, Discoverer 10.1.2.0.2. This upgraded version includes the new Analytic Applications 7.9.5 install.
- Available at:
<http://www.oracle.com/partners/home/pf/global/business-intelligence/auth/bi-challenge-to-go.html>
- See BIC2g.oracle.com for more information

Soon to be Available: Widows Server 2003

- Working with Vlamis Software Solutions to address licensing issues
- Will be available shortly in two versions: Trial version (30 day revolving licence) and fully licensed option (no expiry).
- Will contain the entire BIEE, Hyperion, and BI Applications stack, including windows client development tools (not available in linux version).

Getting Started – VMware Config

- Recommend machines that have at least 3G of RAM with 90G disk. (Note: 64bit linux supports 4G+)
- Do not be doing any other tasks (no other running programs)!
- Recommend VMware Player (latest) or VMware Server (V. 1.07 or 2.0). Note: V 1.07 easier to use.
- Memory set to **1.5G** on BIC2g:BI, **2.3G** on BIC2g:EPM. General rule of thumb: reserve at least .5G for your operating system, otherwise reserve the rest for the VM (I.E.: if you have 3G of ram you can adjust the BIC2g:BI up to 2.4G).
- CPU set to **2**. If you only have one CPU this can be changed by editing the .vmx configuration file (look for ncpus setting)
- Network set to **bridged** for both images.

BIC2g:BI Content - Product Installs

- Windows Server 2003
- MS Office 2007
- Oracle Database 11.1.0.6 (multi-byte)
- BIEE 10.1.3.4
- Hyperion 11.1.1
- WebLogic Server 10.3
- Oracle Data Integrator 10.1.3.4.2
- Oracle Real Time Decisions 2.2.1
- Oracle BI Applications 7.9.5 (incl. Informatica 8.1.1 SP4)
- Jdeveloper 10.3 Technology Preview

Oracle Business Intelligence
Challenge 2 Go

Welcome!

Welcome to the Oracle's Business Intelligence Challenge to Go (BIC2g). You have been directed to this page to register this copy of the BIC2g. Once you complete the registration process this page no longer appears.

This BIC2g image contains a usage monitoring tool that collects information about the demonstrations and tools accessed by users of the image. Information identifying the local network of the image is also collected. The collected information is regularly forwarded to our tracking server so we can better assess the demonstration and training priorities of our users by understanding which areas of the image see the most activity.

If you agree to allow us to collect usage information from this image but do not provide an email address, the tool associates the local network and demonstration usage information with this unique instance of the image, but does not associate the data with your profile. Any other use will be limited as specified in Oracle's Privacy Policy [\[link\]](#).

*Because you are seeing this page, this particular copy of BIC2g is **NOT** registered. Please take a moment and complete the registration form - even if you have previously registered another copy of this image.*

Can we collect information about this image?

☒ Yes

☐ No

What's your email address?

How do you intend to use this image? ☐ Demonstrations

(check all that apply)

☐ Special Event

☐ Proof of Concept Development

☐ Solution Development

☐ Training

☐ Other

Tell us about it:

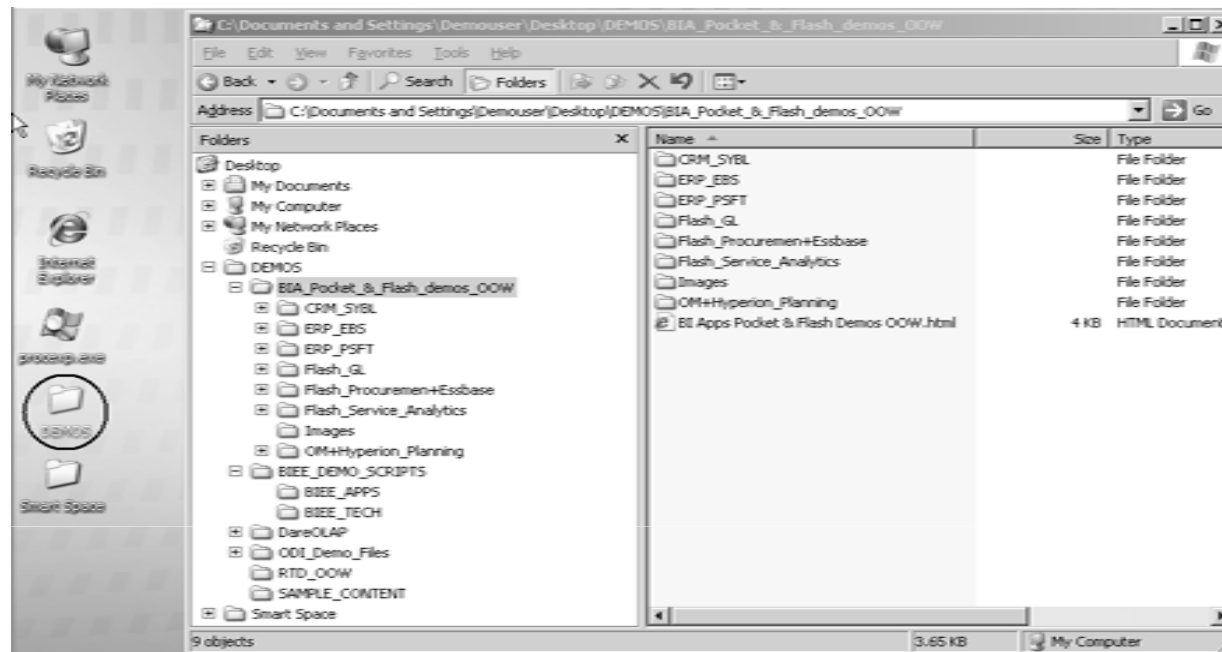

For example, "Classroom training for Partners" or "Demo for XYZ Corp."

Process Control

The screenshot shows the Oracle Process Control web application. The title bar reads "Process Control". The main header includes the "Solution Engineering" logo and the text "Process Control". Navigation links include "Demo View" (highlighted), "Service View", and "Logs". A "Refresh" dropdown is set to "Manual". Below the header are "Start" and "Stop" buttons. The content is organized into sections: "Business Intelligence Enterprise Edition", "Hyperion", and "Oracle Data Integrator". Each section contains a list of services with radio buttons and descriptive text. The "BIEE" service is selected in the first section. The "Essbase" service is selected in the "Hyperion" section. The "Data Integrator" service is listed in the "Oracle Data Integrator" section. A footer note states: "This Process Control tool is *not* part of the standard Oracle Business Intelligence Enterprise Edition Plus software."

Process Control

Solution Engineering **Process Control**

Demo View | Service View | Logs Refresh: Manual

Start Stop

Business Intelligence Enterprise Edition

☒ BIEE This starts all the necessary services/servers for a typical **BI EE Demo**. Click [here](#) to access the demo. Note: to use the MOAD2 demo, please ensure SQL Server is started. WebLogic Server, Database, BI EE

Hyperion

☒ Essbase Start the services necessary for the Essbase demos. Foundation Services, Essbase

☐ BI+ Server This starts all the necessary services/servers for a typical **BI+ Demo**. Foundation Services, Essbase, BIPlus

☐ Tot Plan This starts all the necessary services/servers for a typical Planning Demo. Foundation Services, Essbase, BIPlus, Planning, Scorecard

☐ Tot Consol This starts all the necessary services/servers for a typical Financial Management Demo. Foundation Services, BIPlus, Financial DQM, CALC Manager

Oracle Data Integrator

☐ Data Integrator Start the services necessary for the ODI Demos. Database, Data Integrator, WebLogic Server, SQL Server 2005

This Process Control tool is *not* part of the standard Oracle Business Intelligence Enterprise Edition Plus software.

Process Control

The screenshot shows the Oracle Process Control web interface. At the top, there's a header with the Oracle logo, 'Solution Engineering', and 'Process Control'. Below this, there are tabs for 'Demo View', 'Service View', and 'Logs', along with a 'Refresh' button set to 'Manual'. The main content area is divided into sections for different services: 'Oracle Data Integrator', 'RTD', and 'WebLogic Server'. Each section contains a list of services with their descriptions and the components they start. The 'Oracle Data Integrator' section has a 'Start' and 'Stop' button. The 'RTD' section has a 'Start' button. The 'WebLogic Server' section has a 'Start' button. The footer of the interface states: 'This Process Control tool is *not part* of the standard Oracle Business Intelligence Enterprise Edition Plus software.'

Process Control

Solution Engineering Process Control

Demo View | Service View | Logs Refresh: Manual

Start Stop

Oracle Data Integrator

- ☐ Data Integrator Start the services necessary for the ODI Demos. Database, Data Integrator, WebLogic Server, SQL Server 2005

RTD

- ☐ Real Time Decisions This starts all the services for RTD. Database, RTD WebLogic Server

WebLogic Server

- ☐ Managed Server Only This configuration starts only the managed server of this image in the Managed Server Independent (MIS) mode. In this mode, changes to the server configuration or deployed applications are **not** permitted. WebLogic Server
- ☐ Full Development This configuration starts the node manager, administrative console and managed server for this image. With the node and admin console running, changes to the configuration and to the deployed applications are permitted. Node Manager, WebLogic Admin Console, WebLogic Server

This Process Control tool is *not part* of the standard Oracle Business Intelligence Enterprise Edition Plus software.

Process Control

The screenshot shows the Oracle Process Control tool interface. The title bar reads "Process Control". The main window has a header with "Solution Engineering" and "Process Control". On the right, there are tabs for "Demo View", "Service View" (which is circled), and "Logs". Next to the tabs is a "Refresh" button set to "Manual". Below the tabs, there are "Start" and "Stop" buttons. The left pane contains a tree view with the following sections:

- Database** (expanded):
 - ☐ Oracle BI Server
RPD: TechDemo.rpd
 - ☐ Oracle BI Presentation Server
Webcat: TechDemo
 - ☐ Oracle BI Java Host
 - ☐ Oracle BI Scheduler
- WebLogic Server** (expanded):
 - ☐ Node Manager
 - ☐ WebLogic Admin Console
 - ☐ WebLogic Server
 - ☐ RTD WebLogic Server

Below the tree view, there are two dropdown menus: "Repository: TechDemo.rpd" and "Web Catalog: TechDemo", with a "Set" button below them. The right pane is titled "Process Control Log" and has an "Info" dropdown. It displays a list of log messages:

```
Oracle BI Scheduler started.  
Oracle BI Scheduler starting...  
Oracle BI Presentation Server started.  
Oracle BI Presentation Server starting...  
Oracle BI Java Host started.  
Oracle BI Java Host starting...  
Oracle BI Server started.  
Oracle BI Server starting...  
Listener already running.  
Database: ORCL already running.  
WebLogic Server started.  
WebLogic Server starting...  
Starting Process Engine  
Starting Status Engine
```

At the bottom of the window, it says "Percent Complete: manual" and a disclaimer: "This Process Control tool is *not* part of the standard Oracle Business Intelligence Enterprise Edition Plus software."

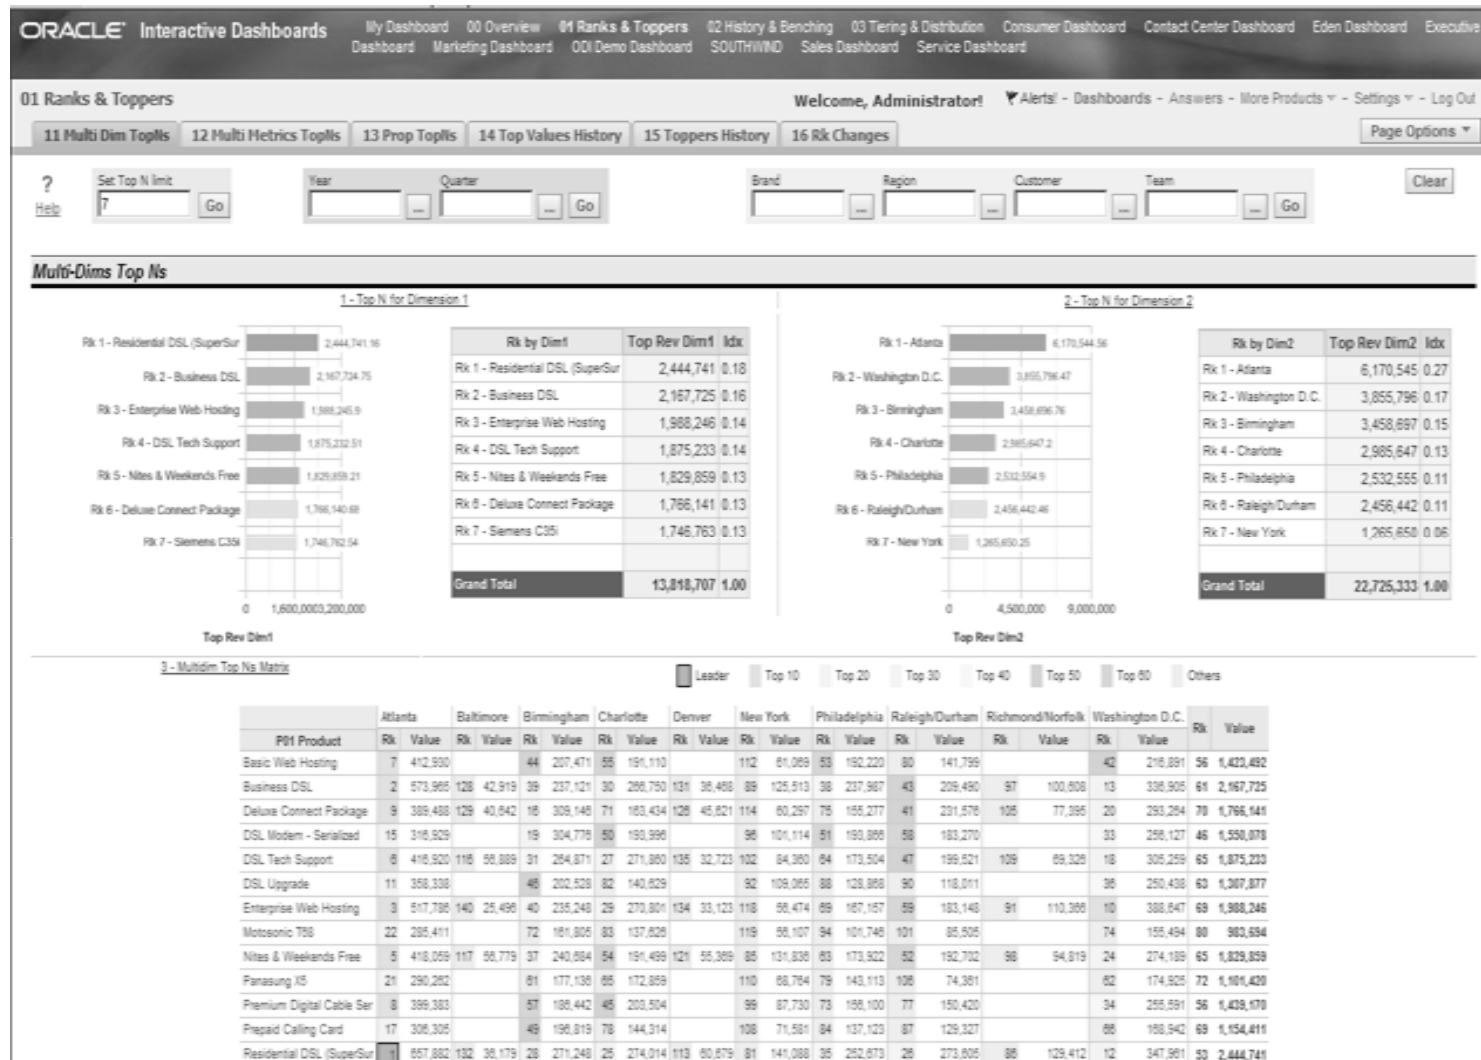

BIC2g:BI Demo Preview

- Userid/pw = Administrator
- TechDemo:
 - Sales Dashboard – see script on desktop
 - Samplesales – see four dashboards on top. This shows new BIEE 10.1.3.4 features. Updated scripts being developed (links to download these at the end of this presentation)
 - Eden Dashboard – shows content with Essbase as a data source. Refer customers to Essbase pods for more detail.
 - ODI Demo Dashboard – new ODI 10.1.3.4 feature that shows data lineage (refer customers to ODI demo pod A49)
 - Includes SmartSpace Desktop, with demo script

BIC2g:BI Demos (userid/pw Administrator)

BIC2g:BI - Samplesales

BIC2g:BI - BI Apps

- See Pocket Demos (desktop) for detailed html click through scripts
- Dashboards: BAAD for Oracle, MOAD2 for SQL Server
- ETL: Includes source and target tables for EBS 11.5.10 and Peoplesoft 9.0.
- ETL: Includes DAC/Informatica
- Updates over previous version:
 - Four subject area rpd/webcat subsets (HR, OM, Procure, FIN)
 - Load filters
 - New tables
- Note: SmartSpace integration available (collaborator, etc.).

BIC2g:BI - Hyperion

- All the EPM products have been installed and configured and available for use. Note that EPMA, MDM, FDM, and FM leverage IIS, which is running on Port 80. Weblogic Managed Server (BIEE, ODI) is also running on Port 80 (conflict – both cannot run at the same time).
- 19 FR reports
- 27 IR reports
- 30 WA reports
- 6 PR reports
- Eden Sales and Retail demos
- Essbase components: EDENODS, TBC, ESSFDM, Text, and Essbase server DEMODRIVE. The Essbase applications which can be generated from the operational data sources include EdenGL, TBC and ESSFDM

Oracle Eden Reporting and Analysis interface showing a file explorer view of the /Eden/Reporting and Analysis directory.

Hyperion – BIEE Integration

- BIEE configured to use Shared Services authentication, with failover to BIEE security (SS not required)
- SmartSpace – Hyperion – BIEE – BIP – Delivers configured.

BIC2g:BI – Other

- **ODI**: Includes hands on class material, basic demo, data profiling and data quality, OBIEE integration, SOA/BPEL integration, and change data capture with Attunity
- **RTD**: Includes E-Commerce Demo
- **OLAP**: XWeek 2008 hands on lab loaded (includes MV rewrite to cubes, DM schema, etc.)

The BIC2g:EPM Image

- BIC2g:EPM 11.1.1 GA Image
 - VMWare image with Win2003 Std OS, Office 2007 Pro Plus
 - Product Versions
 - 10.1.3.4 OBIEE – integrated into the workspace
 - 3.5.1 SOP
 - 11.1.1 GA – No HSF/HBM/Pillar/Enterprise Metrics
 - Oracle 11G Database – startup set to manual
 - 10.1.3.4.5 ODI, Informatica 8.1.1 sp3 (show only designer)
 - Over 23 demos including new demo scripts for Planning and Essbase

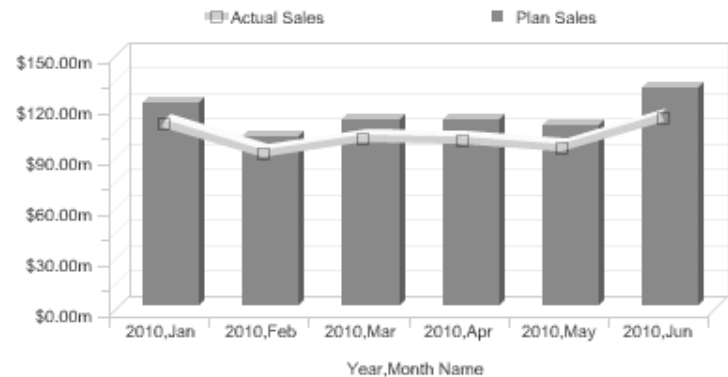

BIC2g:EPM Content

- General
 - Dates moved to 2010
 - Demos ported to Oracle 11G database.
- Planning and Strategic Operational Planning
 - Revamped Planning demo incorporating OBIEE dashboards
 - Web Launch for forms
 - Cascading sheets in Smart View
 - Enhanced charting in Smart View.
 - Calc Manager configured for Planning – FAQs being posted with converted rules
 - FDM drill back from Planning – need to apply an FAQ
 - No EPMA Demo due to issues with shared dimensions – will be ready for the 11.1.1.1 image. Entity and Currency now shared
 - Standard IOP-Planning integrated demo from 9.3.1 upgraded and dates moved to 2010

BIC2g:EPM Content

- New BI Content
 - OBIEE embedded in the workspace
 - SmartSpace shows integration to OBIEE and BI Publisher
 - OBIEE dashboards that correspond to the old Interactive Reporting dashboards are now embedded within the workspace.
 - Paint merged into Eden RPD
 - Essbase cubes Totplan, EdenGL and EdenSale are in the rpd
 - Relational repositories – HSFCorp/EdenDM and FM extended Analytics
- New Essbase Content
 - Dare OLAP – workshop
 - New Essbase demos featuring smart lists, transaction recording and replay, archive and restore.
 - Essbase Studio models including OBIEE, relational, and text based data sources available. Demos include drill back reports from Smart View to OBIEE, FDM, and relational sources.
