Tips on Getting Started

- Use 64-bit OS with 6+GB Ram if possible
  - WebLogic requires 1.6GB Ram
  - OPMN (BI Services) needs 500+MB
  - Faster performance than 32-bit
- Put Database(s) on another Server if possible
  - Easier to manager
  - Reduces memory requirement and disk contention on server
- Load SampleApp and use it as an example
- Build Autostart routines into OS Services or Autostart scripts (blog entries for that not provided by Oracle yet)
- Must have 32-bit Admin Client for now (64-bit coming in 11.1.1.14)
